**DIRECTIONS FOR USE:**

**Identification**

Identify affected vines in the growing season and mark with flagging tape or other identification method. (Consider application of STEMCAP® KF-2™ to vines in close proximity to affected vines as symptoms may appear in these plants the following season.)

**Timing**

Treat marked vines with STEMCAP® KF-2™ at any time post harvest and before budbreak. Preferably application is made before sap movement, usually in early September.

**Application**

STEMCAP® KF-2™ is applied by placing capsules in a pre-drilled hole in the kiwifruit vine stem as follows: Select the application site in the lower 500mm of the vine stem in an area of healthy stem tissue, free of dead and decayed wood and where obvious signs of *Armillaria mycelia* are evident.

1. Pre-drill the vine stem into sound stem wood using an 11mm auger style drill bit, drilling the hole through the centre of the trunk at a slight downward angle to 20-40mm of the opposite side.
2. Apply a single application of STEMCAP® KF-2™ per season by placing 4 capsules into the pre-drilled hole of a mature infected vine.
3. On small vines, around 50mm in diameter, use 2 capsules.
4. Insert a STEMPUG™ into the vine to seal the drilled hole following application.

**Monitoring**

Monitor vine recovery in the following seasons and reapply if the symptoms persist.

## READ LABEL CAREFULLY BEFORE USING STEMCAP® KF-2™

Active ingredient: Contains 500g/kg of tebuconazole in the form of ready to use capsules.

**HSNO CLASS: 6.1E, 6.5B, 6.9B, 9.1A.**

### TOXICITY:

- HARMFUL: MAY BE HARMFUL IF SWALLOWED, INHALED OR ABSORBED THROUGH THE SKIN.
- HARMFUL: MAY CAUSE SKIN SENSITISATION FROM PROLONGED SKIN CONTACT.
- HARMFUL: MAY CAUSE ORGAN DAMAGE FROM REPEATED ORAL EXPOSURE AT HIGH DOSES.

### ECOTOXICITY:

- VERY TOXIC TO AQUATIC ORGANISMS. Avoid contamination of any water supply with product or empty capsules

### PRECAUTIONS:

- KEEP OUT OF REACH OF CHILDREN.
- Avoid contact with skin and eyes, and inhalation of spray mist. Do not eat, drink or smoke while using.
- Wash hands and face thoroughly after use and before eating or drinking and after work.

### STORAGE:

- Store in original container, tightly closed and in a locked, dry, cool, well ventilated area below 30°C, away from light, foodstuffs, feeds, seeds, fertilisers, insecticides, or fungicides used for the protection of crops.
- Storage must be in accordance with the current version of NZS 8409 Management of Agrichemicals.

### SHELF LIFE:

- When stored appropriately, this product should show no significant degradation for 2 years from the date of manufacture. Contact your supplier for further information about the use of any product that is older than this.

### SPILLAGE:

- Wear appropriate protective clothing and prevent material from entering waterways. Absorb spills with inert material and place in waste container. Wash area with water and absorb with further inert material. Dispose of waste safely (such as a suitable landfill)

### DISPOSAL:

- Triple rinse container and add residue to applicator gun. Crush and bury empty container in a suitable landfill.
- Avoid contamination of any water supply with chemical or empty container.

**FIRST AID:** If swallowed DO NOT induce vomiting. For advice, contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor immediately. If skin contact occurs, remove contaminated clothing and flush skin with running water. If splashed in eyes, wash out immediately with water.

### PRECAUTIONS AND ADVERSE EFFECTS:

Do not apply STEMCAP® KF-2™ to vines after budburst. Only apply STEMCAP® KF-2™ in accordance with the Directions for Use.

**CONDITIONS OF SALE:** The use of STEMCAP® KF-2™ being beyond the control of the suppliers, no warranty expressed or implied is given by Omnia regarding its suitability, fitness or efficiency for any purpose for which it is used by the buyer, whether in accordance with the directions or not, and Omnia accept no responsibility whatsoever resulting from the use of this product.
