*Information supplied by client

** Label claim is for Phytophthora control and the application rate is for stem application against Phytophthora stem canker.

Test results		
Test	Method description	Results
Glasshouse assessment <i>(Glasshouse testing)</i>	An assessment of the impact of the product on the incidence of Psa following a challenge inoculation. Young Bruno seedlings were inoculated with aerosol spray containing Psa Key 0 = no leaf spotting 1 = up to 10% 2 = up to 24% 3 = up to 50% 4 = up to 75% 5 = 100%	<p>Uninoculated plants received no treatment and were not inoculated with Psa (negative control); Water plants were treated with water and were inoculated with Psa (positive control).</p>

Comments

Due to the nature of the tests and the mode of action of some products it is noted that some products that are effective in vitro may not be effective when used in the field, conversely some products that are not effective in vitro may be effective in the orchard environment.
