

STEMEX®

STEM
CAP™

PN-2

Proprietary blend of nutrients in the form of a ready to use capsule for application to Silverleaf (*Chondrostereum purpureum*) compromised Pip and Stone fruit trees.

Directions for use

1) Pre drill the through the centre of the tree stem at a point just below the first tier of branches to a depth of 90% of the stem diameter. Use a 10 mm auger drill bit. Ensure drill holes are made in areas of live stem wood. If necessary, drill more than one hole to apply the required total number of StemCaps .

2) Use Rate: The number of StemCap PN-2 capsules to apply is determined by the tree stem diameter. See chart below;

No. of StemCaps	2	3	5	7
Tree stem diameter	Up to 50mm	50mm to 100mm	100mm to 150mm	150mm to 200mm

(Seek a recommendation from Primaxa for trees in excess of 200 mm trunk diameter)

3) After applying StemCaps, always insert a StemPlug/s into the tree stem and strike firmly with a small hammer to ensure a good seal.

600 x 1000mg capsules
